BENEFITS OF DUAL BAND

The D-Link® Xtreme N™ Dual Band Gigabit Router (DIR-825) is the latest addition to the award-winning Xtreme N product family. The dual band technology in the DIR-825 supports 2.4GHz & 5GHz wireless signals at the same time. This allows you to check e-mail and browse the Internet using the 2.4GHz band while simultaneously streaming High-Definition (HD) movies and other media on the 5GHz band. The DIR-825 is designed for users looking to get a true HD wireless connection that can handle multiple HD video streams throughout the house, while being backward compatible with existing 802.11g and 802.11a products.

POWERED BY HD FUEL™

Use the power of HD Fuel to play your movies and games with superior technology over competing routers. We've combined the clarity of the 5GHz wireless band with our advanced Intelligent QoS engine to create a technology ideally suited for streaming your HD media.

WHY INTELLIGENT QoS IS BETTER!

With some routers, all wired and wireless traffic, including Voice over IP (VoIP), Video Streaming, Online Gaming, and Web browsing are mixed together into a single data stream. By handling data this way, applications like Streaming Video could pause or delay. With the D-Link Intelligent QoS Prioritization Technology, wired and wireless traffic are analyzed and separated into multiple data streams. These streams are then categorized by sensitivity to delay, so applications like VoIP, Video Streaming, and Online Gaming are given priority over Web browsing. This enables multiple applications like Streaming Video and Gaming to stream smoothly to your TV or PC.

Delivering best-in-class performance, network security, and coverage, the Xtreme N Dual Band Gigabit Router (DIR-825) is the ideal centerpiece for your wireless network in the home or office.

WHAT THIS PRODUCT DOES

Create a dual band wireless network to share high-speed Internet access with computers, game consoles, or media players from greater distances around your home or office.

XTREME N™ ROUTER BENEFITS

- + Intelligent QoS technology prioritizes Internet traffic as well as wired and wireless network traffic
- + Xtreme N technology allows for farther home coverage¹
- + Secure your wireless network using advanced WPA™ or WPA2™ encryption
- + Supports Good Neighbor Policy – will not interfere with other wireless networks
- + Backward compatible with 802.11g and 802.11a devices including game consoles and digital media players

RECOMMENDED SYSTEM REQUIREMENTS

For Optimal Wireless Performance:

- + Use with Xtreme N Dual Band USB Adapter (DWA-160)

MINIMUM SYSTEM REQUIREMENTS

- + Computer with:
 - Windows Vista®, Windows XP® SP2² or Mac OS® X (v10.4)⁴
 - Internet Explorer v6 or Mozilla Firefox v1.5
 - CD-ROM
 - Network Interface Card
- + For Internet Access
 - Cable or DSL Modem
 - Subscription with an Internet Service Provider (ISP)

PACKAGE CONTENTS

- + Xtreme N Dual Band Gigabit Router
- + 2 Detachable Antennas
- + CAT5 Ethernet Cable
- + Power Adapter
- + CD-ROM⁵ with
 - Installation Wizard
 - Product Documentation

¹ Maximum wireless signal rate derived from IEEE Standard 802.11g, 802.11a, and draft 802.11n specifications. Actual data throughput will vary. Network conditions and environmental factors, including volume of network traffic, building materials and construction, and network overhead, lower actual data throughput rate. Environmental factors will adversely affect wireless signal range. Wireless range and speed rates are D-Link relative performance measurements based on the wireless range and speed rates of a standard Wireless G product from D-Link. Maximum throughput based on D-Link's draft 802.11n devices.

² 1-Year Limited Warranty available only in the USA and Canada.

³ Computer must adhere to Microsoft's recommended System Requirements.
